<ul style="list-style-type: none"> • The Fund will seek to achieve its investment objective by investing in an actively managed portfolio of Fixed Income Instruments and other securities of which at least 80% will be invested in Capital Securities in accordance with the policies set out in the Supplement. Capital Securities are Fixed Income Securities, contingent convertible bonds and/or equities issued by financial institutions such as banks and insurance companies. • The Fund uses a combination of bottom-up and top-down processes to identify appropriate Capital Securities with each Capital Security being passed through three screens. The first screen is the Investment Advisor's top down view of the economy and global financial markets. The second screen is the Investment Advisor's bottom-up research which incorporates an evaluation of the relative strength of balance sheets and company earnings power together with maintaining strong access to senior management teams of financial institutions and on-going dialogue with them about the sources of future credit strength or weakness. The third screen is valuation. The strength of how well a Capital Security passes each screen will assist the Investment Advisor in any investment decision. • The Fund is considered to be actively managed in reference to the Benchmark, which the Fund uses for performance comparison purposes. However, the Benchmark is not used to define the portfolio composition of the Fund or as a performance target. • The Fund's assets will not be allocated according to a pre-determined blend or weighting across a geographical area. There are no restrictions on the minimum credit rating of Fixed Income Instruments held by the Fund and the Fund may invest without limit in securities that are rated lower than investment grade. • The Fund may use derivative instruments such as futures, options, options on futures and swap agreements (which may be listed or over-the-counter) and may also enter into currency forward contracts. Derivative instruments may be used for (i) hedging purposes and/or (ii) investment purposes and/or (iii) efficient portfolio management. • The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective. --	--------------------------

Market and Credit Risks

- **The Fund is subject to credit risk** as it could lose money if the issuer or guarantor of a Fixed Income Security in which it invests, or counterparty to a derivatives contract, is unable or unwilling to meet its financial obligations.
- **The Fund is subject to currency risk** as changes in exchange rates between currencies or the conversion from one currency to another may cause the value of the Fund's investments to diminish or increase.
- **The Fund is subject to interest rate risk** as the value of Fixed Income Securities held by the Fund is likely to decrease if nominal interest rates rise.

Liquidity Risks

- **The Fund is exposed to liquidity risk** where it invests in derivative instruments which are difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price. The Fund is not listed in Singapore and you can redeem only on Dealing Days. There is no secondary market in Singapore for the Fund.

Product-Specific Risks

- **The Fund's use of derivative instruments is subject to the derivatives risks described in the Irish Prospectus, such as liquidity risk, interest rate risk, market risk, credit risk and management risk.** Derivatives will typically be used as a substitute for taking a position in the underlying asset.
- **The Fund is subject to global investment risk** as securities of certain international jurisdictions may experience more rapid and extreme changes in value.
- **All or part of the Management Fees may be charged to the capital of the Fund,** and on redemption Shareholders may not receive back the full amount invested.
- **Dividends may be payable out of the capital of the Fund or of certain share classes,** as a result capital will be eroded.
- **The Fund may be subject to CoCos risks.** These include loss absorption risk, risks that the Fund's CoCos holdings will be subordinated to holders of unsubordinated obligations of the issuer, and market value fluctuations.
