INSTITUTIONAL CLASS ACCUMULATION AND INCOME SHARES

Morningstar Rating™ ★★★★★

Fund Description

The investment objective of the Fund is to seek maximum total return consistent with prudent investment management.

The Asia High Yield Bond Fund is an actively managed portfolio that invests primarily in Asia high yield bonds. The fund is diversified broadly across industries, issuers, and countries in Asia on the basis of PIMCO's top-down and bottom-up processes.

This fund offers compelling diversification benefits and the opportunity to gain exposure to different sectors of Asian markets.

The Fund may use or invest in financial derivatives.

The fund employs PIMCO's fundamental research process, including top-down economic views, bottom-up security selection and extensive global resources.

ABOUT THE BENCHMARK

The J.P. Morgan JACI Non-Investment Grade Index comprises fixed rate US Dollar-denominated high yield bonds issued by Asia sovereigns, quasi-sovereigns, banks and corporates. The existing JACI Non-IG contains both fixed and floating rate bonds issued by Asia-domiciled entities having a nominal outstanding of at least US\$150 million and more than one year to maturity.

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

⊕PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment.¹Annualised Distribution Yield is as of last month ending 12/31/2023. The dividend distribution rate/yield is based on historical dividend rate/yield. The dividend amount or dividend rate/yield is not guaranteed. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. Source: PIMCO, index provider for benchmark data.²Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. The value of shares of the Fund and the income accruing to them, if any, may fall or rise. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations. The fund may use or invest in financial derivative instruments and be subject to various risks (including for e.g. liquidity risk, interest rate risk, market risk, credit risk and management risk etc.) associated with such investments in financial derivative instruments. A fund's use of, or investment in, financial derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Participation in the markets for financial derivative instruments involves investment risks and transaction costs to which a fund may not be subject if such strategies are not used. Investors should consider the investment objectives, risks, charges and expenses carefully before investing.
